

Teaching practices in musical way

Form of the group: Standing or sitting in circle

Name of activity: pass the bean bag

Objectives: summarization of lesson - inclusion - active participation

Description

Kids sitting in the circle. Music is playing. Teacher (also in the circle) holds a bean bag and passes it to the next person. The bean bag keeps travelling as long as the music plays. Teacher and students try to pass the bean bag following the beat. When the music stops, the person who has the bean bag should say something they have been taught in the lesson.

Teacher forms it to a sentence, repeats it in rhyming and then students repeat the rhyme. At this point the teacher can write the sentences on the board.

When students get well acquainted with this activity they can be asked to try to rhyme the sentences and form it to lyrics for song. When all sentences are written then they play a rhythmic pattern and accompany the rhymes they created as a whole song.
